

THB's AI Powered Growth Platform for Healthcare Providers

{ Overview and Proposal for VPS Lakeshore }

May 2026

CONFIDENTIAL

www.thb.group

hello@thb.group

Context

- ❑ Recent discussions between VPS Lakeshore and THB indicated three areas where Technology and THB's Growth Platform can help optimize existing processes and deliver revenue upside/ acceleration:
 1. **Maximizing follow-up and retention of patients**, e.g. winning back lost chronic patients who have stopped visiting VPS Lakeshore hospital, increasing visits per chronic patient per year → **THB's Patient Engagement Module**
 2. **Increasing post consult conversions**, e.g. patients taking Radiology, Dx/ Rx services from VPS Lakeshore. Importantly, maximize OP to IP conversion through structured follow-up → **THB's Care Coordinator Module**
 3. **Lead & Enquiry Funnel Management** – needs deeper review and understanding of current processes and help identify exact areas where opportunity can be maximized → **THB's Lead & Opportunity Nurturing Module**
- ❑ This presentation includes materials on #1 and #2 above ; #3 will be shared along with discovery findings
- ❑ In these materials, we have included a potential approach for VPS Lakeshore to start seeing the benefits of THB's Growth Platform through a phased approach

Contents

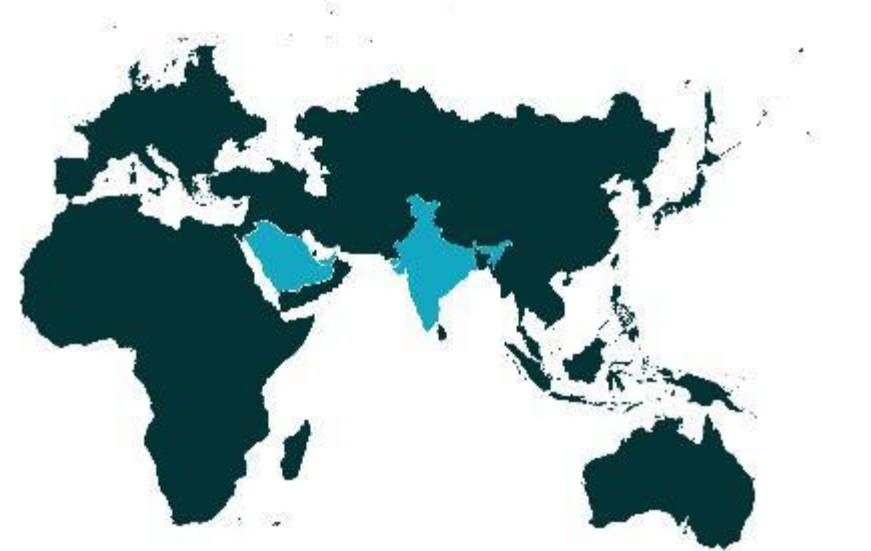

- **Quick Recap on THB**

- Details on focus modules

- Proposed VPS Lakeshore x THB Collaboration

About THB Group

- Growth Transformation Platform for Hospitals
- Serving leading enterprises across India, Middle East and South East Asia
- Delivered upto 10% incremental growth and 15% incremental EBITDA for hospitals
- Robust off-the-shelf platforms deployed at scale; orchestration across patient continuum
- 100M+ patients, 1M+ doctors, including multi-country / multi-system deployments

Data Platform Use-Cases Enabled	Analytics Patient Engagement	Unified Data Platform Patient Engagement	Analytics Patient Engagement	Unified Data Platform Analytics	Analytics Data Valuation Digital Front Door Patient CRM

Case Study:

>AED 20mn generated per quarter – called out by MD in investor presentations

“We continue to prioritize patient-centric healthcare and efficient communication through our digital CRM strategy, resulting in an incremental revenue of Rs. 41.3Cr (AED 20.7Mn) in Q1 FY24”

*- Ms Alisha Moopen,
Aster DM*

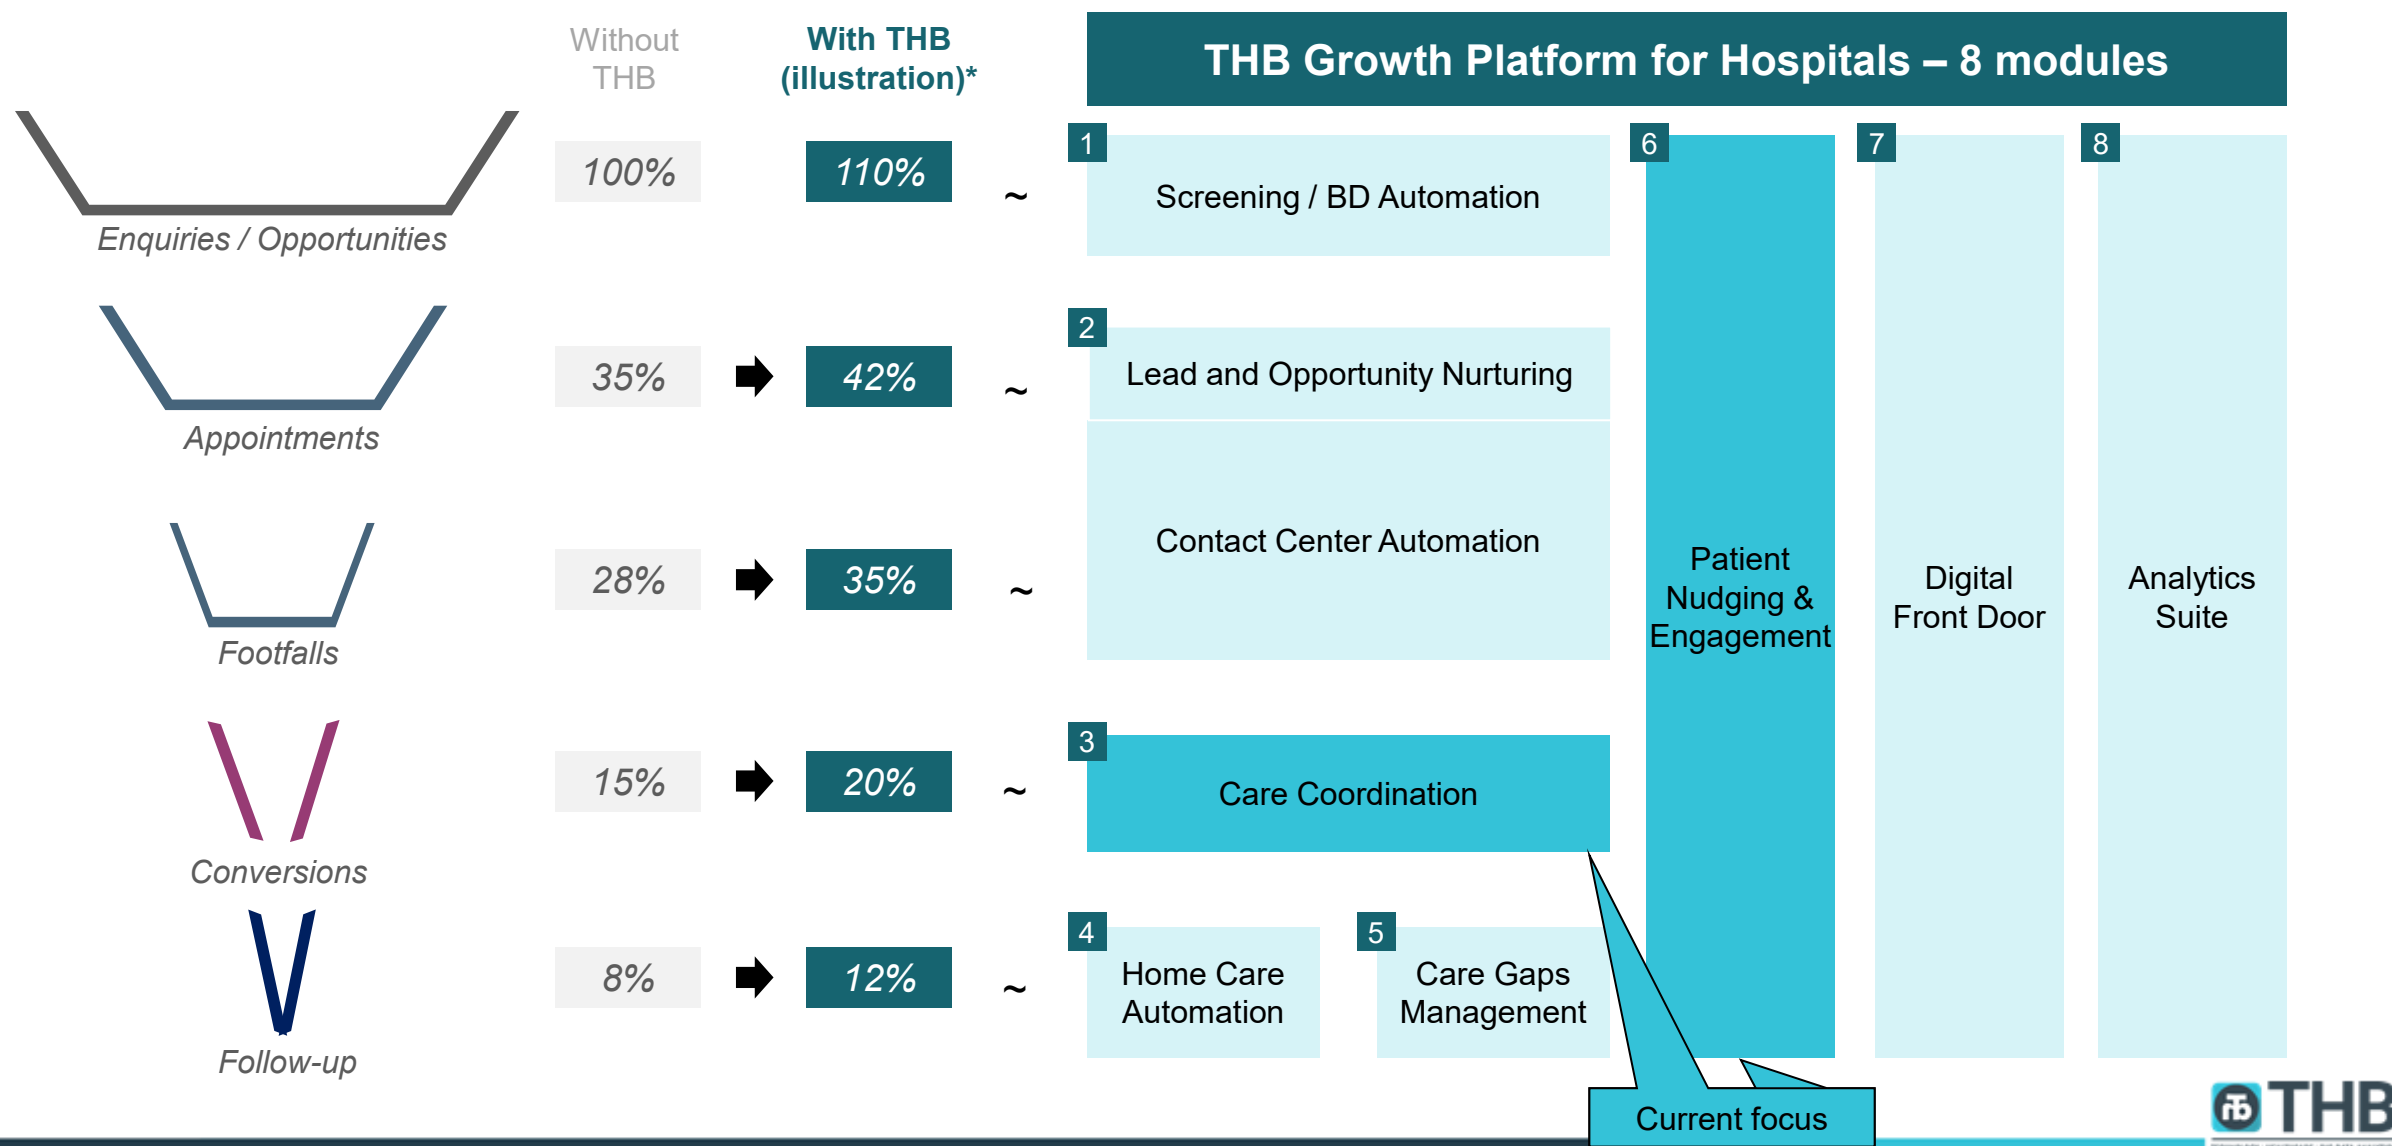

Valuation & Recommendation:

Aster DM Healthcare is well positioned to leverage its extensive experience of working in a 100% insurance market in the GCC to derive better margins and increasing share of insurance segment in the Indian market. The company could witness healthy topline and footfall growth in GCC as its digital CRM initiatives saw lot of activations due to connection between hospitals, clinics, pharmacies.

Ob-Gyn (Pregnancy) Engagement: Post Partum

Breastfeeding	Importance	Dear<>, Breast milk is crucial for your baby's overall development. Other than breast milk, don't give any foods, drinks, or even the water. There is enough water in breast milk to prevent the baby from getting dehydrated.	6th day after delivery
Breastfeeding	Initiation	Dear<>, Initiate breastfeeding within one hour of a normal delivery. Ensure that the baby is suckling well. If suckling is poor, ensure correct positioning and attachment of the baby to the breast. To know more about how to breastfeed, your baby, consult your doctor.	10th day after delivery
Breastfeeding	Diet	Dear<>, During breastfeeding, eat food that is nutritious, easy to digest, and provides the most calories. Avoid alcohol, caffeine, and spicy foods. Drink milk twice a day. Drink plenty of fluids, such as coconut water, mineral water, soup, fruit juice, and water. Avoid sugary drinks, soft drinks, and alcohol.	1st day After delivery
Breastfeeding	Duration and Frequency	Dear<>, Breastfeed your baby for 6 months. After 6 months, you can introduce solid foods. Breastfeed your baby on demand, which means whenever your baby is hungry. There is no need to follow a strict schedule. Breastfeeding frequency should be as per the baby's needs.	3rd day After delivery
Newborn care	Keeping warm	Dear<>, Always keep your newborn warm. Low temperatures may adversely affect the baby. The best way to warm a baby is by placing the baby in skin-to-skin contact with you or any adult. Skin-to-skin contact can also be used to keep a baby warm during transport and at home.	48th day After delivery
Newborn care	Umbilical cord	Dear<>, Do not apply anything on the baby's cord and keep the cord and umbilicus dry. In case of any discharge or infection in the cord, consult your doctor.	6th day After delivery
Newborn care	Eyes	Dear<>, You should clean the eyes of the baby once every day using sterile cotton swabs soaked in sterile water or normal saline. Each eye should be cleaned using a separate swab. The routine use of antibiotic drops is not recommended.	17th day After delivery
Newborn care	Diaper signs	Dear<>, Diaper signs in baby - breastfeeding poorly, no suckling, severe jaundice, becomes irritable, develops a fever or rash could be toxic. Breathing fast, difficulty in breathing or blood in the stool. Consult your doctor immediately if your baby has any of these signs.	6th day After delivery
Babycare	Immunization	Dear<>, Follow immunization schedule for protection of your baby from life-threatening and crippling diseases.	
Babycare	Diet After 6 months	Dear<>, Timely introduction of a variety of energy and nutrient-rich complementary foods in adequate amounts in addition to breastfeeding keeps the baby healthy.	Female: Delivered a baby 6 months ago

Sample Pathways

Condition	Identification Approaches	Sample Nudges
Diabetes	- HbA1c ≥ 6.5 - Metformin / insulin purchase - Fasting glucose labs	- Quarterly HbA1c reminder - Annual eye screening - Foot care education - Hypoglycemia education
Diabetes Retinopathy	- Diabetes labs or meds - No eye billing in last 12 months	- Annual retina screening reminder - Education on silent vision loss
Hypertension	- Antihypertensive meds (Amlodipine, Telmisartan) - Creatinine / lipid labs	- BP monitoring education - Medication adherence nudges - Annual kidney & lipid tests
Dyslipidemia	- Statin purchases - Lipid profile results	- Lipid re-test reminders - Diet education - Cardiac risk awareness
CKD	- eGFR < 60 - Elevated creatinine - Repeat renal labs	- Nephrology referral reminder - Low-protein diet education - Quarterly labs reminder
Dialysis Adherence	- Dialysis billing - EPO / phosphate binder purchases	- Session adherence reminders - Fluid restriction education - Infection warning signs
TKR Recovery	- Surgery billing code - Discharge summary	- Physiotherapy exercises - Red flag symptoms - Follow-up visit reminders
Hip Replacement Recovery	- Implant billing - Ortho surgery discharge summary	- Mobility precautions - Physiotherapy schedule - Fall prevention tips
Pediatric Vaccination	Vaccine billing history	- Due / overdue vaccine alerts - Parent education

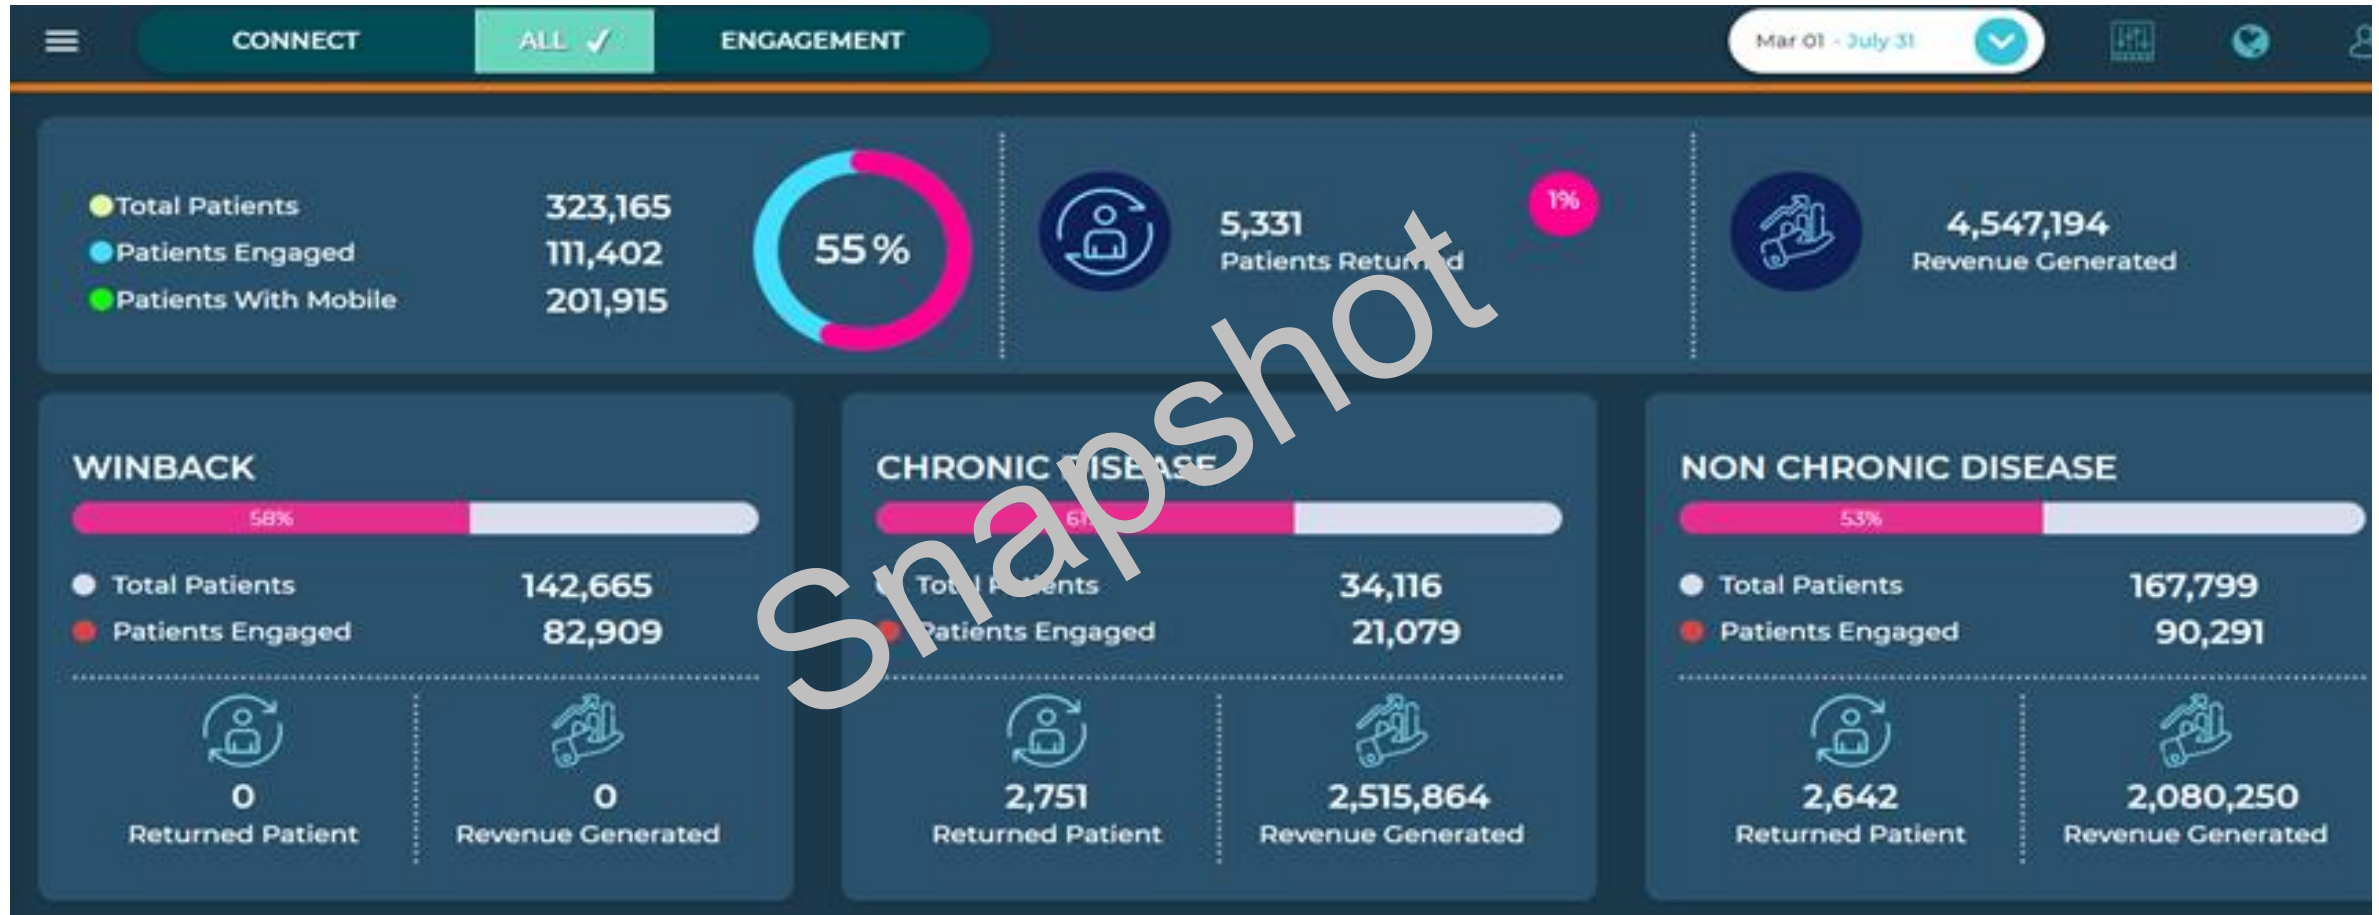

THB's Patient Engagement Module – 5 of many

Sample Pathways Cont.

Condition	Identification Approaches	Sample Nudges
Fracture Healing	• Cast / fracture fixation billing • X-ray orders	• Immobilization care • Calcium/vitamin D education • Follow-up imaging reminders
Surgical Follow-up	• Appendectomy / hernia billing • Discharge summary	• Wound care education • Infection signs • Follow-up appointment reminder
Post C-Section	• LSCS billing • OB discharge summary	• Wound care • Breastfeeding education • Postpartum warning signs
CABG / Angioplasty	• Cath lab billing • Discharge summary	• Cardiac rehab education • Medication adherence • Lifestyle changes
Anemia Management	• Hb < normal • Iron / B12 prescriptions	• Nutrition education • Supplement adherence • Repeat CBC reminder
Thyroid Monitoring	• TSH abnormal • Thyroxine purchases	• 6-month TSH testing • Medication timing education
Stroke Secondary Prevention	• CT/MRI brain billing • Antiplatelet / statin purchase	• Medication adherence • Rehab reminders • Warning signs of recurrence
Chemotherapy Adherence	• Oncology drug billing • Discharge summaries	• Cycle reminders • Side-effect education • Fever alerts
Breast Cancer Screening	• Age + prior mammogram billing	• Annual screening reminders • Self-exam education

Care Coordinator Module – 2 of many

Key features/ attributes

- Integration with EMR to auto-capture tasks
- Manual tasks can be created in case of lower EMR adoption through in-built Photo + OCR module
- Quick reference meta-tags on each lead card to ensure personalized experience
- In-built calling and messaging feature to ensure monitoring of input efforts, and not just outcomes
- Pre-curated content library to (a) standardize reach-outs, (b) save coordinator time
- Timely reminders for follow-ups

Sample Growth Transformations

Large regional chain in India

- Drove growth transformation with focus across patient continuum
- **27%** revenue acceleration delivered over the last 3 years

Leading hospital chain in UAE

- Maximized patient lifetime value through robust focus on chronic disease management and patient retention
- **c. AED 100Mn** extra revenue delivered per year

Top 5 hospital chain in India

- Delivered one of the most loved Self Help Patient App for a leading hospital chain
- 30%+ footfalls now pursued through the App ; 20%+ revenue acceleration in Conversion and Home Care
- Delivered digital revenues to **\$20mn+**

Top 5 hospital chain in SE Asia

- Setup Enterprise Data Warehouse, Unified Data Platform and Analytics Command Centre
- Identified EBITDA upside of **300-400 basis points**

Leading diagnostic chain in India

- Delivered Marketing Campaign and Patient Nudging Suite enabled by 100+ Clinical Cohorts
- Delivered **\$5mn** extra revenue per year

Case Study from Top 5 Healthcare Provider in North India

Rs. 15Cr revenue generated by winning back lost chronic patients

CONTEXT

Scope

- **Client:** Leading Indian hospital chain
- **Product:** Patient Engagement Platform
- **Coverage:** ~700K patients across 3 hospitals

Objectives

- **Win-back patients** with no visits in last 12 months (primary objective)

Solution Deployed

- **68 patient cohorts** (across 10 conditions) created as per bio-markers, demographics, visit history etc.
- **Personalized patient journeys** for each cohort
- **Automated engine** to deliver nudges across channels as per journey

Impact Generated

- **Rs. 15Cr revenue generated in 10 months directly attributable to THB's PEP platform i.e.,**
 - Win-back return that is (a) within 30 days of engagement and (b) visit is for a therapy area relevant to the nudged content
- **10K OP patients won-back + 621 IP admissions** converted from OP visits

IMPACT

~718K Patients Engaged

- **850K patients reached out**, successful message delivery to 718K
- **50L+ total engagements** sent over 10 months with ~400K patients engaged monthly on average

Win-back return within 30 days of engagement

- **38K net visits generated** across 27K patients
- **Conversion rate of 5.4%**

Attributable win back

- **Patients visits for therapies attributable to the messages sent**
- **Incremental OP revenue of ~5Cr (~10K patients) and ~10Cr (621 admissions)**

Case Study from Top 5 Healthcare Provider in West India

Increased Admissions & CT Scans by 80%

1

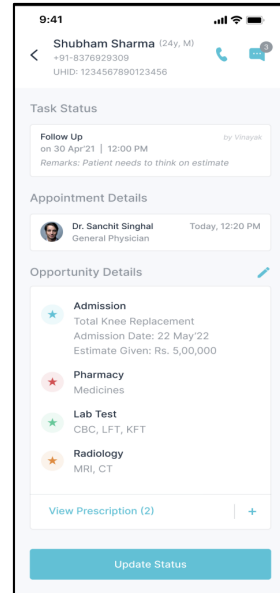

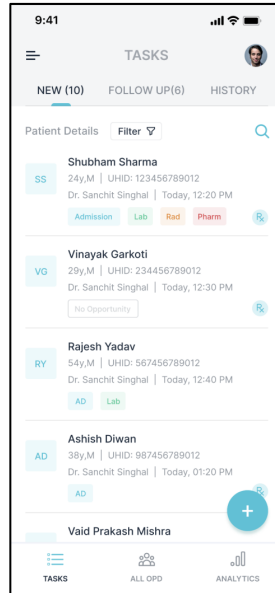

Doctors Not Using EMR / Not capturing leads

Top 15 doctors with maximum OPDs without leads				
Doctor name	Total OPD	OPD without tasks	% opd w/o tasks	OPD without Rx
Doctor 1	xxx	yyy	72%	Zzz
Doctor 2	xxx	yyy	77%	Zzz
Doctor 3	xxx	yyy	34%	Zzz
Doctor 4	xxx	yyy	21%	zzz
Doctor 5	xxx	yyy	36%	zzz
Doctor 6	xxx	yyy	84%	zzz
Doctor 7	xxx	yyy	28%	zzz
Doctor 8	xxx	yyy	11%	zzz
Doctor 9	xxx	yyy	43%	zzz
Doctor 10	xxx	yyy	49%	zzz

- Doctor & Staff Training, Detailed tracking with weekly callouts for doctors with highest # issues

2

Poor conversion of leads

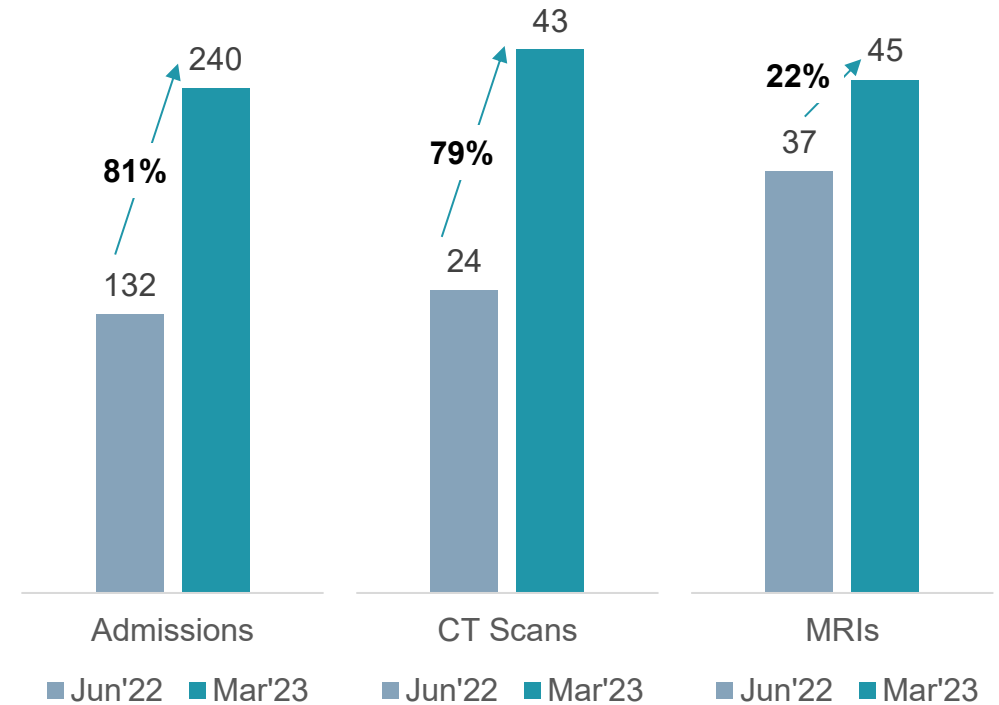

- Lead tracking & conversion using **Counsellor App** that enables hospital staff to track and follow-up with high ticket size patients

IMPACT

~80% increase in admissions and CT scans, 20% increase in MRIs compared to baseline

Procedures per day (indexed)

Contents

- Quick Recap on THB
- Details on focus modules
- **Proposed VPS Lakeshore x THB Collaboration**

Suggested Approach

Phase 1 – Experience Sprint

☐ Patient Engagement Module Sprint

- ☐ Automated nudges to winback lost chronic patients who have not visited the hospital for more than 6/12 months
- ☐ 2-3 chronic conditions to be aligned for Sprint phase, e.g. chronic liver disease, chronic kidney disease, cardiology

☐ Care Coordinator Module Sprint

for 3-5 coordinators across 1-2 departments
with focus on minimizing change management

Phase 2 – Wider Rollout

☐ Patient Engagement Module Scale-up

- ☐ Scale to 10-15 conditions to automate engagement across a large portion of patient base (ensuring no patient remains unengaged)
- ☐ Manual campaign management to enable marketing teams to run their own marketing campaigns

☐ Care Coordinator Module scale-up

across all hospital departments,
with particular focus on surgical departments (e.g. CONGO)

Commercials

Phase 1 – Experience Sprint (6 months)

- ❑ Includes 1 month of integration + 5 months of live engagement ; during month #5, scale-up decision making process initiates
- ❑ Rs. 5.5 lacs per month for 6 months, i.e. Rs. 33 lacs for “Experience Sprint”
 - ❑ Patient Engagement Module (upto 3 conditions): Rs. 3.5 lacs per month
 - ❑ Care Coordinator Module (upto 2 departments and upto 5 coordinators): Rs. 2 lacs per month
 - ❑ Includes 1 month of setup (HIS integration, WA integration, Configuration) + 5 months of engagement, invoiced monthly at the start of the month

Phase 2 – Wider Rollout / Scale-up (Starting 7th month)

- ❑ Scale-up configuration across 10-15 conditions and 8-10 departments: Rs. 10 lacs (one-time)
- ❑ Scale-up licensing fee starting go-live of the scale-up phase
 - ❑ Patient Engagement Module (typically upto 15 conditions configured ; can be agreed upon): Rs. 7.5 lacs per month
 - ❑ Care Coordinator Module (typically upto 10 departments and upto 50 coordinators ; can be agreed upon): Rs. 5 lacs per month
